Nature's Best Hope

DOUG TALLAMY

PROFESSOR OF ENTOMOLOGY AT THE UNIVERSITY OF DELAWARE

Sunday, March 21 at 7-8 p.m.
Virtual | Live via Zoom

FREE AND OPEN TO THE PUBLIC

[REGISTER HERE FOR THIS LIVE EVENT.](#)

Recent headlines about global pollinator declines and three billion fewer birds in North America are a bleak reality check about how ineffective our current landscape designs have been at sustaining the plants and animals that sustain us. Such losses are not an option if we wish to continue our current standard of living on Planet Earth. The good news is that none of this is inevitable. Tallamy will discuss simple steps that each of us can- and must- take to reverse declining biodiversity and will explain why we, ourselves, are nature's best hope.

This event is co-hosted by the Master of Science in Environmental Biology and MACS (Multi-faith Alliance of Climate Stewards).
